

**IAI (Intra-abdominal Injury) Study:
Clinical Outcome-RA Data Collection Form #6a**

Patient Study ID Number:

- -
Study # Site # Patient #

RA completes this form:

- **For all enrolled patients**

Data Source: ED record and/or hospital chart.

1. Disposition from the ED:

- ☐ Home → *answer question 1a*
☐ Against Medical Advice (AMA) → *answer question 1a*
☐ Death in ED
☐ Admit - general inpatient → *answer question 1b*
☐ Admit short-stay unit (< 24 hour) / observation unit → *answer question 1b*
☐ Operating Room → *answer question 1b*
☐ ICU → *answer question 1b*
☐ Transferred to (Name of hospital) _____ → *answer question 1b*
☐ Other _____ → *answer question 1b*

1a. Was the patient subsequently admitted as an inpatient within 30 days of ED Discharge? ☐ Yes ☐ No

1b. Was patient readmitted to the hospital within 30 days of ED triage? ☐ Yes ☐ No

2. Date of Hospital Discharge:

____ / ____ / ____
(mm) (dd) (yyyy)

3. ICD-9 codes upon ED or Hospital discharge (If ICD-9 codes not available, list top 10 discharge diagnoses)

NOTE: Please look specifically for the presence of a **FEMUR FRACTURE** in the discharge diagnosis. If the patient has a **FEMUR FRACTURE**, please write in **FEMUR FRACTURE** under description and enter the ICD9 Code as "821".

ICD9 Code	Description
____ . ____	
____ . ____	
____ . ____	
____ . ____	
____ . ____	
____ . ____	
____ . ____	
____ . ____	
____ . ____	
____ . ____	

4. Did the patient have an intra-abdominal injury diagnosed in the ED and/or during hospitalization by any diagnostic method?

- ☐ No ☐ Yes → Please have the site PI complete a Clinical Outcome Form (6b) for this patient

5. Did the patient undergo a Diagnostic Peritoneal Lavage (DPL)?

- ☐ No ☐ Yes → *if yes, please answer 5a ***with PI consult****
5a. Was the DPL abnormal? ☐ No ☐ Yes

6. Was a Laparoscopy (surgical visualization) performed?

- ☐ No ☐ Yes → *enter the de-identified dictation of the laparoscopy into the database (see MOO for instructions)*

7. Was a Laparotomy (abdominal surgery) performed?

- ☐ No ☐ Yes → *enter the de-identified dictation of the dictation of the laparotomy into the database (see MOO for instructions)*

8. Did the patient have a significant thoracic (Chest) injury diagnosed in the ED and/or during hospitalization? Thoracic injuries include the following: pulmonary contusion, hemothorax, pneumothorax, pneumomediastinum, tracheal-bronchial disruption, aortic injury, hemopericardium, pneumopericardium, cardiac contusion, rib fracture, sternal fracture, or diaphragm injury.

- ☐ No ☐ Yes → *Please have the site PI complete a Clinical Outcome Form (6b) for this patient*

9. Did the patient have a pelvic fracture diagnosed in the ED and/or during hospitalization? Pelvic fracture includes fracture to any of the following pelvic bones: ilium, ischium, pubis, sacrum, acetabular fracture, open book pelvic fracture, SI joint disruption, hip dislocation.

- ☐ No ☐ Yes → *Please have the site PI complete a Clinical Outcome Form (6b) for this patient*

10. Did the patient undergo any *non-abdominal* surgical procedure in the first 24 hours after ED Triage?

- ☐ No ☐ Yes → *if yes check all surgical procedures performed in the initial 24 hours:*
- ☐ Orthopedic
 - ☐ Facial (plastic or ENT)
 - ☐ Neurosurgical
 - ☐ Eye (ophthalmology)
 - ☐ Vascular
 - ☐ Urologic
 - ☐ Other _____

11. Did the patient die within 30 days of injury?

- ☐ No ☐ Yes → *answer 11a below*

11a. What was the cause of death (from death summary or autopsy report)?

- ☐ Intra-abdominal injury
- ☐ Multiple blunt force trauma
- ☐ Traumatic brain injury
- ☐ Thoracic injury
- ☐ Other (list) _____
